Clean Code
Chapter 1

- Programmers get slower because of messy Code and It's reduce the productivity.

- Long Code isn't good.

- Your Job doesn't write code to work but write Code that Can other Peers understand.

- Good code does one thing elegant and efficient and one thing well.

- Clean Code is simple and direct.

- Clean Code always Looks Like it was written by Some one who Cares.

- we should do effort in writing clean Code.

- It's easy to add new features when we want or when the requirements changes to the clean Code.
